Classic WPC Decking

Dex Tech Wood Plastic Composite Decking is state of the art composite decking. The raw materials are taken from environment-friendly and non-toxic natural wood. Combined with high-performance plastic materials, heating, fitting and pressing at one time, to create the perfect mold. From raw materials to production all materials are 100% free of formaldehyde, lead, benzene, heavy metals, carcinogens, soluble volatiles, or radiation,

Co-Extrusion WPC Decking

- Ultra-low maintenance
- Longevity and durability
- Scratch and stain resistant

Co-extrusion WPC is the upgrade version of traditional WPC. Co-extruded decking, in short is a particularly high-tech decking option that boasts even higher performance than normal composite decking. Co-extruded technology is, without a doubt, the most advanced technology currently being used in the composite decking industry.
